Subject: RE: Portland Harbor RI Section 5

Jim – I had a discussion with Integral today (you were not able to make the call) and we went over the information that they had yet to provide for this section. We are close, but not quite done yet. FYI..I'm not going to include the information on Mann-Whitney in my edits to this section. There is too much work to do to include it, so I told Integral I was not going to include it. If the LWG believes that it is important to include it, then they can have Integral work on something during the 30-day review period that is satisfactory to EPA to be included. Right now, I have what I need to finish the sediment, surface water, and biota sections so I will focus on those. Integral is to get me the remaining information on Sediment trap and TZW sections next week, although I have most of it. Lots of writing to do!

Thanks Kristine, please let me know if there is anything else you need or want from us to help with Section 5. Jim.

Bob and Jim – Based on where I am in the revisions and Integral is with the data products, it is really unlikely that the comments will be sent on Tuesday. However, we will still try to wrap this up next week.
